Description

Roundup Optima+ Concentrate

Roundup Optima+ Weed killer is great for really large areas, 1 litre covers up to 1500m². This concentrate multi-purpose weed killer is for use on unwanted vegetation. Absorbed by the leaves, it moves throughout the entire plant, above and below ground. Destroys annual and deep rooted perennial weeds such as grasses, dandelions, docks, bindweed and thistles. It is inactivated immediately on contact with soil and is then broken down by soil micro-organisms to allow replanting. Use from February to November.

We have a great range of products to help you create your perfect garden and you can choose the 'click and collect' option and pick up from your local store.
