Husqvarna 315 Automower

HV-MW315

Advanced robotic mower for areas up to 1500 m², designed to handle lawns with complexity and slopes. Ideal for replacing a medium size pedestrian lawnmower.

Description

Husqvarna Automower 315

Advanced 4-wheeled robotic mower for larger and more complex grass areas. Suitable for medium sized areas up to 1500 m² and can also handle slopes with an incline of 40%. Smart technology adapts the amount of mowing to the lawn's growth rate, enables spot mowing of a limited area of longer grass and guides the mower through narrow passages. The intuitive menu system on the large, user-friendly display allows personal settings for when you'd like the machine to mow. Snap-covers in different colours are available as options.

Automower® Connect@HOME – The Bluetooth® solution, Automower® Connect@HOME, gives you full control of the mower right in your smartphone. You can easily send start, stop and park commands, check and adjust the settings. Bluetooth® communication up to 30 metres range. Standard for all 300-400 series.

Weather timer – Adjusts the working time to the lawn's growth rate, meaning that Husqvarna Automower® will maximize its mowing time during periods of strong grass growth. In sunny or dry weather, or late in the season, the mower will spend less time mowing, which decreases wear on lawn and mower.
