Stihl BGA 86 Cordless Blower

Experience the power and convenience of our advanced cordless blower, designed for professional use in expansive urban environments. It offers a remarkable 50% increase in blowing force compared to the BGA 85, all while being lighter in weight. The device features a round nozzle, a comfortable soft handle, and a blower tube that can be adjusted to three different lengths for optimal user comfort. Additionally, there's an optional flat nozzle available to enhance the air speed. For long periods of use, we suggest using the AR backpack battery for maximum efficiency.

SPEED CONTROL

FOR OPTIMAL SUCTION AND BLOWING POWER. To use the suction and blowing power of your tool optimally on all surfaces, you can adjust it precisely and on an infinitely variable basis using the speed control.

SINGLE-HANDED MULTI-FUNCTION HANDLE

COMFORTABLE OPERATION. Thanks to the single-handed multi-function handle, you can control your tool easily and reliably with one hand. Because all relevant control elements are integrated in the handle, it can be operated by both right-handed and left-handed users.

LENGTH-ADJUSTABLE BLOWER TUBE

REDUCES LOSS OF PERFORMANCE. You can adapt the blower tube to the user's height. This means that you avoid unnecessary performance loss due to working too far from the ground, and also enjoy very comfortable work.

We are an authorised Stihl dealer and are one of the first to stock the new Stihl cordless range. Why not [click here](#) to check our wider range of Stihl products?
