Stihl RM 248 T Petrol Lawnmower

The RM 248 T from STIHL is a petrol single-speed lawn mower perfect for entry-level users aiming to maintain small to medium-sized lawns at home. As part of the new 2 Series petrol lawn mowers, it boasts innovative features that make it an ideal choice for home gardeners.

This lawn mower is constructed with a sheet steel deck, offering a 46 cm cutting width and single-point height adjustment ranging from 20 to 100 mm. The EVC 205 engine is easy to start, allowing you to get to work effortlessly. On a full tank of fuel, the RM 248 T can mow lawns up to 1200 m².

The RM 248 T provides four different mowing options without the need for additional tools, though we recommend consulting the owner's manual before use. You can:

- **Cut and collect** with the grass catcher box fitted.
- **Cut and drop** by removing the grass catcher box.
- **Side discharge** using the integrated flap in the deck.
- **Mulch** with the multi-blade and mulching attachment.

The comfort mono-handlebar ensures easy access to the grass catcher box, simplifying removal and emptying when full. The fill level indicator on the grass catcher box lets you know exactly when to empty it. The 52-litre grass catcher box is ergonomically designed for easy opening and fast emptying. Additionally, the sturdy mono-handlebar is height adjustable and foldable for compact storage after use. The RM 248 T also comes with a 10-year domestic warranty (subject to registration and annual servicing)

Self-propelled

Wheel Drive - Effortless Lawn Mowing: The wheel drive simplifies mowing, particularly on slopes and expansive lawns, allowing you to move faster and with minimal effort.

Highlift blade - The highlift blade gives a precise finish to the lawn and ensures optimal filling of the grass catcher box. The blade creates a strong air current in the housing, which makes the grass stand upright before cutting and efficiently carries the clippings into the catcher box using an integrated and powerful air flow system.

CENTRAL CUT-HEIGHT ADJUSTMENT FOR LAWN MOWERS

Central cutting height adjustment - For the best mowing results, you can easily adjust the cutting height of your lawn mower across several levels. A scale indicates the current height, and the central cut-height adjustment feature allows you to tailor your mowing to the specific conditions of your lawn.

Super-Softgriff

Super-Soft Handle - For a comfortable lawn mowing experience, the ergonomic super-soft handle ensures that your arms are protected by absorbing any vibrations while you mow.

POLYMER HOUSING

Polymer Housing - For high resistance and lightweight performance, the robust polymer housing is petrol-resistant and shields the engine block from UV radiation. Additionally, the high-quality plastic is exceptionally light.

ENGINE WITH EASY-START SYSTEM

Engine with Easy-Start System - Effortless and dependable, the easy-start system ensures that you can start your tool with minimal effort, whether it's a cold or warm start.

Innovative grass catcher box

Folding Grass Collection Box - Effortless Emptying: Your lawn mower features a folding grass collection box, making it easy to empty clippings. The fill-level indicator shows when it's time to empty the box. An airstream ensures dense filling, maximizing the box's capacity. Side slats direct the air towards the ground, preventing dirt from being swirled up.

Mulching function

Mulching Function - Mow and fertilise in a single step with the mulching function. This feature eliminates the need to dispose of cuttings and allows you to naturally fertilise your lawn. The mulching blades finely shred the cut grass into small particles, which are then evenly distributed over the turf.
