Stihl RM 756 GS petrol-driven lawn mower

SH-63780113411

Description

RM 756 GS petrol-driven lawn mower: efficient working for professionals thanks to 3-speed wheel drive

Built for Professionals. Engineered to Endure.

The STIHL RM 756 GS is purpose-built for heavy-duty, long-term use in demanding professional settings. Featuring a 54cm (21") cutting width and three-speed gearbox, this high-performance mower effortlessly tackles lawns up to 3000m².

At its core is a powerful and dependable Kawasaki engine, paired with a 3-litre fuel tank to ensure extended run times with fewer interruptions. The hybrid housing is both rugged and durable, ready to withstand the rigours of commercial work.

Comfort is key when mowing large areas, and the RM 756 GS delivers with a foldable, height-adjustable dual-comfort handlebar, allowing you to work in an ergonomically correct position all day long. Integrated anti-vibration technology helps reduce fatigue, letting you focus on the job without discomfort from engine vibrations.

The 80-litre fabric grass catcher ensures optimal airflow for efficient grass collection and features a visual fill indicator for convenience. Each alloy wheel is fitted with high-quality sealed bearings and can be independently adjusted to adapt to varying lawn conditions.

Engineered for longevity and reliability, the RM 756 GS includes a 1-year professional warranty (with registration and regular servicing).

Cut-Height Adjustment on each Wheel

FOR FLEXIBLE ADAPTATION TO THE TERRAIN. The stable, smooth-running cut-height adjustment allows you to adjust each wheel of your lawn mower individually. This enables the greatest possible flexibility in adapting to the respective terrain

Large 3-Litre Tank

ALLOWS LONG PERIODS OF MOWING WITHOUT REFUELLING. Thanks to your lawn mower's large 3-litre tank, you can mow extensively without having to refuel. The tank has a captive lid which is ventilated.

Collision Protection

Damage to the housing is prevented by the front impact protector. It provides protection during start-up on stony ground or path borders. It can also be used when securing the STIHL lawn mower during transport.

Powerful OHV Engine

EFFICIENT AND DURABLE. Advanced technology makes this powerful OHV motor very powerful. The overhead valves ensure that the petrol/air mixture burns very cleanly and efficiently. This type of engine is very powerful and durable.

3-Speed Wheel Drive

The mowers drive speed can be controlled by means of three forward gears.

Blade Brake Clutch

The blade brake clutch disengages the blade and engine to protect the crankshaft. This allows the grass catcher box to be emptied without restarting the engine. The mower can also be driven around the garden without the blades working.

Super-Soft Handle

FOR COMFORTABLE LAWN MOWING. The ergonomic super-soft handle means that your arms are protected when mowing the lawn, as any vibrations are absorbed.

Textile Grass Collectin Box

WITH INTEGRATED DUST PROTECTION. Due to its 80-litre capacity, this durable textile grass collection box is ideal for mowing large lawns. Integrated dust protection ensures dust particles remain reliably in the collection box. The textile collection box can be conveniently folded up so that it can be stored safely and conveniently.

Hybrid Housing

Hybrid housing is characterised by there light weight and durability. These are ensured both by the outer housing made from magnesium with scratch-proof powder coating as well as the inner housing of impact-resistant polymer.

Stihl Anti-Vibration System

FOR MORE PLEASANT WORK. Vibrations can occur when you put your tools through their paces, and these are particularly noticeable in the grip area. The buffer and spring elements of the STIHL anti-vibration system reduce the transmission of engine vibrations to the handle area and therefore to your body. The result is that your tool is more comfortable to hold and your work is much less tiring.
