**Reduced-emission engine technology** - 2-stroke engine with stratified charge. A fuel-free layer of air is created between the burned charge in the combustion chamber and the fresh charge in the crankcase, reducing the amount of fuel lost during the charge cycle. This results in more power with a lower weight, up to 20% lower fuel consumption than regular 2-stroke engines and significantly reduced exhaust emissions.

**Stihl Ergostart** - STIHL ErgoStart cuts the effort required to start the tool by half, while the starter cord can be pulled at just one third of the normal force. A coil spring between the starter cord and the crankshaft smoothes out force peaks, making them virtually undetectable through the cord itself.

**Stihl Ecospeed** - Stihl Ecospeed enables the user to control the brushcutter engine speed individually on the operating handle.

We are an authorised Stihl dealer and can provide full service back up and maintenance for your Stihl equipment.
