Hayter Harrier 48 – 475A BBC – Autodrive – Variable Speed

HY-MWHA475

Our Price: £1199

Description

The Harrier 48 rear roller rotary lawnmower is ideal for medium to large lawns. The rear roller on these powerful self-propelled machines, gives a superb striped finish to fine lawns and with the cutter blade raised, rougher areas can also be cut with ease. With its powerful collection abilities, fallen leaves can also be removed from the lawn.

Features and benefits:

- **Two piece, ribbed rear roller** with differential for superior traction, easy turning and a perfectly striped finish. The roller also offers the ability to cut over the lawn edge
- Fitted with a **Blade Brake Clutch (BBC) mechanism** which stops the cutting blade but keeps the engine running. This reduces the number of engine restarts e.g. no need to stop the engine whilst emptying the grassbag. It is also useful if you have to move the mower over non-grassed areas.
- Die-cast **aluminium deck** provides corrosion resistance, high durability and long life. Deck extends beyond wheelbase for easy mowing around borders
- **Briggs & Stratton engines** provide guaranteed power and performance. Ease of starting is assured with ReadyStart® - no need to prime
- Tough **ABS underdeck liner** for enhanced cut and collection performance, easy cleaning and quieter operation
- **Large capacity fabric** grassbag can be lifted through the handlebar for easier emptying
- Can be **used without** grassbag as a rear discharge mower. Can also be used to collect autumn leaves.
- Counter-balanced **single lever height-of-cut adjustment** for easy selection of cutting height
- Smooth running, **long life ball bearings** in front wheels
- **Folding handlebar** for compact storage

We are an authorised **Hayter** dealer and can provide full service support and maintenance for your Hayter product.
