Description

Portek Scatterbird Mk4 Gas Powered Bird Scarer

Setting the industry standard for durability, the Scatterbird range is purpose built for bird scaring and designed specifically to meet the needs of the farmer.

Next generation, incorporating many innovative features including the use of a UV stabilised, impact resistant polypropylene casing along with improved performance and control via Bluetooth from an iOS or Android smart device.

To operate the Scatterbird MK4, you will require a 12 volt battery and a cylinder of propane gas (any size of propane cylinder is suitable for use). Use of an optional internal 12 volt battery (not included) is however highly recommended to keep the wiring away from vermin and help prevent flood damage.

Steel legs are included with the unit to raise it off the ground and allow the full force of the **“BANG”** to be heard with maximum effect.

A superb all-weather piece of equipment, providing both excellent value for money and service.

Providing solutions for the farming industry, **Ernest Doe & Sons Ltd** are on hand for any assistance you may require when purchasing this product.
