Description

Ecoplug Max Tree Stump Killer (Box x 100)

Ecoplug Max is a treatment for tree stumps to minimise root and stump sprouting.

An effective concept for controlling regrowth and can be safely used in a variety of areas such as Amenity, Forests, Verges, Embankments etc.

Each plug contains water soluble Glyphosate, which when hit into a stump is released into the xylem and phloem of the tree. This kills the stump fast and safely.

Can be used in all weather conditions, all year round with no effect to any neighbouring trees.

For best results, stump treatment should occur no more than 2 days after felling.

Simple to follow instructions. See specification sheet for Store in a cool dry place. Protect from Frost.

Contents: 100 x 283mg plugs.

Operator certification is required for use in public or amenity areas by professional users. Anyone who is PA1/6 qualified is covered. Anyone who wishes to use only this product and has no need to use sprays could take PA6 D (Hand held applicators requiring minimal calibration).
