Martin Lishman Protimeter Grainmaster i2-S

Built on the foundations of the UK's most popular moisture meter, the Protimeter Grainmaster i2 offers the same accurate moisture measurement with new enhancements.

Accurate moisture measurement is critical at harvest time and throughout drying and storage, so it makes sense to use a meter that has a track record for providing consistent, accurate and reliable grain moisture readings.

Using tried and tested crop calibrations, the robust electronics of the Protimeter Grainmaster i2-S give high levels of repeatability between samples.

As a grinding moisture meter you can also be confident that readings will record grain moisture accurately throughout each sample.

- 16 pre-programmed crop calibrations (Wheat, Barley, Oats, Oil Seed Rape, Canola, Linseed, Peas, Beans, Maize, Sunflower Seed, Coffee Beans, Soya Beans, Milled Rice, Paddy Rice and Sorghum, Rye Grass)
- 29 other calibrations are available; users can also create their own calibration using a built-in 0-100 scale

The Protimeter Grainmaster i2-S is supplied in a hard carry case with a button dust protector, spare grinder-blade set, spare battery and free first year service voucher.

Martin Lishman also provide a full 12 month warranty and a complete after-sales service and calibration back-up capability.

Optional probes available separately. Please contact **Ernest Doe & Sons Ltd** for any assistance you may require when purchasing this product.
