Description

Stihl RM 756GC Professional Lawn Mower

The STIHL RM 756 GC petrol lawn mower has been specially developed for tough, long-lasting use in a professional environment. With its 54cm/21" cutting width and its 3-speed gearing, this professional lawn mower is designed to mow areas up to 3000m².

The hybrid housing is sturdy and durable. The foldable, mono-comfort handlebar can be adapted to your body height, ensuring the most comfortable working position, essential when you're mowing for long periods of the day. This model features anti-vibration elements which effectively reduce engine vibration, allowing you to comfortably use the mower for a full working day.

With a 3 litre fuel tank for long running times coupled with the reliable and powerful Kawasaki engine, this mower is designed for large and tough mowing jobs. An 80 l grass catcher bag– made from tough fabric makes it easy to see when the grass catcher bag is full, whilst allowing excellent air flow to ensure the bag is filled to the brim. Each wheel can be adjusted independently to suit the lawn conditions, the alloy wheels also have premium, well sealed bearings for a long service life.

The RM 756 GC comes with a 1 year professional warranty (subject to registration and servicing).

Cutting height adjustment at each wheel - With the sturdy, easy-to-operate cutting height adjustment each wheel of the STIHL lawn mower can be adjusted individually.

Large 3-Litre tank and Kawasaki OHV engine - This 3-litre tank enables prolonged operating periods without refuelling and features a captive tank cap. The powerful Kawasaki engine with large air filter is high-torque, smooth-running and durable

3-speed gearing and Blade Brake Clutch - The blade brake clutch disengages the blade and engine to protect the crankshaft. This allows the grass catcher box to be emptied without restarting the engine. The mower can also be driven around the garden without the blades working. The mowers drive speed can be controlled by means of three forward gears.

Mulching function - During mulching, the mulching blade shreds the mown grass before it falls back into the turf as a nutritional fertiliser. And with the appropriate mulching kit available as an optional accessory for this lawn mower, the machine can also be converted into a Multi-mower.
