Our Price: £175

Description

Harkila Heat Jacket Willow Green-Black

The Harkila Heat Jacket is a lined jacket with built-in heating membranes that can be set to exactly the temperature you desire. This makes it an excellent choice as both a mid & outer layer for a wide range of outdoor activities in the cold weather.

Set between 30°C and 52°C using an associated smartphone app or manually to either 38°C, 46°C or 52°C using the push button control on the chest.

Charge between times through the waterproof USB port in the right hand pocket and with a power bank of 10,000mAh, the waistcoat can output its' highest temperature of 52°C for about 7 hours @ 0°C outside temp.

Automatic sensors place the membranes into standby mode to save energy and turn back on again if and when the temperature falls.

Machine washable, pack away in the supplied dry bag for easy transportation & storage.

Setting aside the fantastic technology, practical features include a soft fleece lined collar, heat reflecting lining, inner pocket, two side pockets and a radio pocket on the left chest.

UK Size: XXL ONLY.
