Description

Eliet Major 9.0hp Garden Shredder

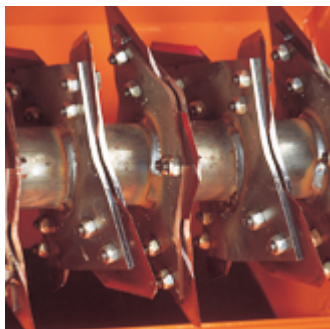

The ELIET MAJOR 4S is an appreciated tool by both the demanding private garden lover and the professional. This chipper is compact and light, which allows it to access the wood even when having to go through the smallest of rear gates. The wide feed-in opening offers great comfort when introducing thick branches with lots of twigs attached measuring up to 60 mm.

Robust Frame - A professional machine must have the quality that is needed to match its purpose. That's why ELIET firmly decided to choose an all-welded frame that is manufactured from high quality steel plate and that is fully welded.

Wide Intake - Unlike its smaller brother (the Minor), the ELIET Major 4S has a much wider feed-in opening. The integral guide funnel is useful for feeding several branches into the machine at the same time.

Razor-Sharp Blades - 20 razor-sharp blades chip all kinds of garden waste into nice chippings. Moreover, you can reverse the blades so that they last twice as long. The patented Eliet Chopping Principle ensures that the blades cut the wood in the fibre direction, which requires a lot less power than the chipping systems that are known everywhere. The blades also attain an utmost wide action field and, thus, guarantee that everything is chipped without fail before it leaves the crushing chamber.
